PGMI GUIDELINES FOR ABSTRACT SUBMISSION

Word Count: Limit word count to 250 words.

Title: It should be concise not exceeding 15 words and accurately reflect the content of research article.

Author's Names: Write name of Principal Investigator as 1st Author. Also write names of co-authors. Maximum number of authors should not be more than six.

Authors' Designation should also mentioned.

Name of Institution/department should be mentioned.

Address for Correspondence: Institutional address should be mentioned.

Email address of 1st Author/Principal Investigator should be provided.

Abstract:

Background/Introduction: It should not be more than two sentences outlining the rationale and significance of the research study.

Objective(s): Provide specific, measurable, achievable, realistic and time-bound (SMART) objective(s).

Methods: Mention study design, place and duration of study, ethical approval, sample size & sampling technique, inclusion & exclusion criteria, interventions (if any), study variables, data collection procedure and statistical tests used for analysis.

Results: Show key findings as text, tables & illustrations. Mention only important observations and significant statistics.

Conclusion: A concluding statement aligned with the study objectives and results should be given.

References: Only 2 to 3 relevant references supporting the rationale/significance and/or methods of the study should mentioned. Use Vancouver style of referencing.
